To Herr von BUELOW
(through Herr WILSHAUS)

20 October 1944

When checking over the two special assignment vehicles IY 34000 and IY 31 541 today, I found that neither carried either gasoline nor any other type of fuel.

When questioned about this, drivers KOCH, F.No. 360 345 and NEUHAUS, F.No. 360 318, stated that that is how they had taken the vehicles over upon entering their employment.

My efforts to find gas or fuel in motor shed 1 and 2, were unsuccessful.

Foreman SUEDBRACK too, whom I notified by telephone, intimated to me that he had no fuel whatever at his disposal.

Vehicles in such a state cannot under any circumstances be used in an emergency.

It would be expedient, if you for your part, requested the motor pool to assign only really serviceable vehicles in future.
