96. Counteracting of offenses against discipline in the plants (2384/44)

The Plenipotentiary for Labor Allocation, in order to clarify doubts
as to which offices the reports of the plant managers concerning breach
of labor contracts are to be directed and which offices are competent
for returning these persons to work, has issued the following directives
excerpts of which are published in the following:

- 101 -

- 2 -

- 1) Reports against Germans are to be directed to the plenipotentiaries of the Reich Trustee for Labor.
- 2) Reports against foreigners (inclusive residents of the Protectorate, Poles, and Slovaks) as well as against Eastern workers are to be directed to the State Police Offices. In communities where no State Police Office exists, the Local Police Authorities are competent.
- 3) The reports have to be made as individual reports. It is to be avoided to submit collective reports, i.e. lists, because this would delay the carrying-out of investigations.
- 4) Reports which are made only four weeks after the breach of labor contract was detected or which are submitted to offices which are not competent have no chance of being dealt with successfully. Reports on escapes are to be submitted immediately, in case of foreigners reports about not returning from leave have to be submitted only 6 days after the granted leave had expired.
- 5) In case of Germans, persons who broke their labor contract will be returned by the Police Offices, in case of foreigners by the State Police.
- 6) The plants are advised to support the return measures by making use of the plant protective force or in another way, and that they themselves should collect the workers after they are discharged from prison or from a labor reform camp.

End of document.
