SECRET

M e m o r a n d u m
by Herr Sonnenberg
of a discussion in Berlin on 5 May 1939

(TRANSLATOR'S NOTE:
Penciled remark: Re: Foreign staff)

- Present:
- Planetta - Wa.Prff. 10 S III (Translator's Note: Economic control officer)
 - Capt. Reinlein - " " (part of the time)
 - Sonnenberg - F.K.

While in Berlin for a discussion with the General Staff of the Luftwaffe, Dept. 4, I also visited Frw. 10 S III. The following data, previously not known to us, of the English 9.4 cm. A.A. gun were mentioned:

- (Stamp:) Overall length of the barrel - 4,099 m.
T 18/5 Firing weight - 3,914 Kg. or more
Elevation - -5 : 85
Rapidty of firing up to 16 rounds per minute.

New Skoda A.A. guns, 4.7 cm., 7.5 cm. and 7.65 cm. were mentioned to me and photographs shown. The first named exists with a simple cross-shape mounting and with wheels remaining attached to the mounting when in firing position. It was stated that it was not for the time being possible to let us keep photographs. Also I was not given any data. All three calibre appear to have mechanical ramming devices, and the two heavier calibres at least also had muzzle brakes.

(The 4.7 cm. gun with cross-shaped mounting and the 7.65 cm gun have already been pictured in the Coast Artillery Journal, March/April 1939)
(Translator's Note: this paragraph crossed out in ink)

(Page 2 of original)

I have gained the impression that from no other side do the respective Army departments get such far reaching support in their investigation of foreign armaments as from F.K.
