Ku/N.

1.) Subject: Workers Home Seumannstrasse

Inspection on 5 January 1942.

Conducted by:

Assistant Kuhlmann and Administrator Fassbender, partly under the direction of Herr Becker accompanied by Herr Duerr.

Inspected rooms:

Office, dining room, kitchen, mail-room, laundry, storage space, all bedrooms on the second floor and spot checks of the bed rooms on the other floors, as well as the toilets and wash-rooms.

Deficiencies found:

Kitchen: Enlargement of the rooms, used for the cleaning of vegetables and for the peeling of potatoes, is an urgent necessity and ought to be realized quickly.

Mail-room: The side of the room which is still open is to be covered with a glass-wall in order to obtain a better security against burglary. The order has been placed.

Laundry: Washing-drum and centrifuge are in need to be replaced because of strong deterioration. Delivery of the spare parts have been requested from the heating office long ago. The order has not been carried out as yet in spite of frequent claims. Everything must be done in order to prevent the closing of the laundry.

Storage space: Is partly set up at present as storage space for the co-operative stores. In addition to that, the new barracks No. 7 was put at the disposal of the co-operative stores for storage purposes. The storage requirements of the kitchen in Seumannstrasse have now been fully met according to information by the co-operative stores.

handwritten dealt with, the centrifuge
has been delivered.

The banister of the staircase is to be fastened. handwritten
dealt with.

Bedrooms: Part of the occupants use the electrical installations for unauthorized purposes. Unauthorized connections for radio-sets, cooking-utensils and lamps were found. The lids are missing on many junction-boxes, several switches have to be replaced. The junction-boxes and switches in the office and the kitchen, as well as in the storage rooms of the cooperative stores, are also to be replaced.

Our building administration has placed orders with KLa for the repair and checking of the entire installations.

Herr Fassbender will receive a letter for not taking any steps against the installment of the unauthorized equipment; apart from that, a warning to the occupants will be posted. Copies of this regulation have been made.

dealt with in handwriting.

Because of disorderly conditions it will be necessary to inspect the rooms, especially the lockers.

dealt with in handwriting.

The bedrooms and other parts of the home will again be equipped with window- and air protection shades.

Wash-rooms: Missing towel-holders have to be replaced.

Air-raid protection equipment:

Sand-bags are missing in the basement. The administrative and personnel building is to receive additional air protection equipment.
dealt with in handwriting.

Food:

Taking of food samples was carried out by Herr Becker. Result good. There will be a record of food samples.

Health:

The necessary appointment of a camp physician for the promotion of general health conditions is still open.
